Why

Why Data Analytics?

Every business runs on data. Data analysts transform raw information into insights that drive smarter decisions and measurable impact.

Industry mentorship

Mock interviews

Portfolio projects

Demystify Data

Build a strong foundation in data concepts, tools, and thinking - no prior tech background required.

Learn by Doing

Work on guided, hands-on projects that mirror what analysts do on the job.

Accelerate Your Career

Gain practical experience and job readiness support to confidently pursue entry-level data roles.

#OUTCOMES

What You'll Be Able to Do After This Course

By the end of the program, you'll be able to:

- ✓ Write SQL queries to extract and analyze data
- ✓ Build reports and dashboards for stakeholders
- ✓ Clean, transform, and integrate datasets
- ✓ Understand how data drives business decisions
- ✓ Confidently present projects in interviews
